RE: Deadline Extension for the Notice of Intent for City of Columbia MS4 NPDES Permit

Mr. Karesh,

The City of Columbia Engineering Department is in the process of completing the City's Notice of Intent for the newly-issued Phase II Municipal Separate Storm Sewer System NPDES permit. To aid in completion of the NOI, the City has solicited the assistance of a contractor (AMEC). However, in light of the current holiday season and to help facilitate the development of a more robust NOI, the City requests a 30-day extension of the upcoming NOI deadline of December 31, 2010. The new submittal date will be January 31, 2010. We would appreciate your flexibility in this important matter.

Sincerely,
Jim Fuller P.E.
